Link Hub Project

by Mir Mumtaz Ali

- Developed a web portal that enables users to submit and share website URLs under specific categories.
- Implemented an admin review system allowing approval or rejection of submitted links.
- Designed a category-based structure for organized and easy browsing of approved links.
- Promoted community-driven content management through user participation and admin moderation.
- Technologies Used: Microsoft SQL Server, C#, Entity Framework Core, Bootstrap, ASP.NET Core MVC Tools Used: Microsoft SQL Database Server 2022, Visual Studio 2022
